PROJECTS

Tandem / React, Next.js, FastAPI, Python, ElevenLabs, Gemini API

- Developed a **real-time agentic AI tutoring system** that identifies and analyzes student mistakes on a **TLDraw whiteboard** using the Gemini API, with ElevenLabs Conversational AI providing live spoken feedback at **under 75ms latency**.
- Integrated **MediaPipe Face Mesh** directly in the browser to monitor student engagement in real time, processing **468 facial landmarks** to detect signs of disengagement with **90% accuracy**.
- Orchestrated **three external APIs** (ElevenLabs Scribe, Gemini, TLDraw) within a **stateless session architecture**, implementing WebSocket reconnection logic and in-memory state management to keep all services reliably in sync.

Musal / React, TypeScript, Spotify API, FastAPI, PostgreSQL, D3.js

- Built a **data pipeline** to collect and aggregate top chart data across **50+ countries** via the Spotify API, capturing millions of data points on regional listening patterns.
- Applied **clustering algorithms** to group nations by musical similarity, surfacing cross-cultural listening trends across audio features like BPM, key, and energy.
- Designed an **interactive world map dashboard** visualizing country-level music taste.
- Analyzed correlations between music taste clusters and **geographic, linguistic, and cultural factors** to uncover what drives regional listening habits.

Personal Website / TypeScript, React, Next.js, HTML, CSS

- Designed and developed a **modern, responsive portfolio** with a **clean UI/UX**.
- Optimized the site for performance, readability, and maintainability.
